HOOKAH ASSEMBLY

We recommend moistening the hose with water in order to make assembly easier.

Step 1

Screw the stem tube to the magnetic base of the hookah.

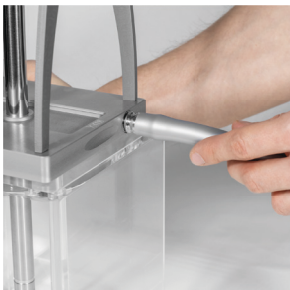

Step 2

Attach the hookah base on the Cube.

Step 3

Insert the hose connector into the hookah base.

Step 4

Put the hose on to the locking rim of the connector.

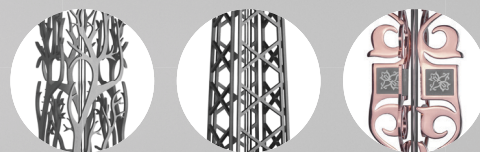

Step 5

Put the spring on the hose.

Pull the hose and spring up to the locking rim of the connector.

Design types:

SERVICE

Check the condition of the magnetic ring in the connector port. If there are marks of damage to the coating or rust, the magnet should be replaced. Threaded connections should be twisted easily, without unnecessary effort clockwise.

Step 1

Attach the connector without a hose into the connector port.
With pressure on the connector port.
Unscrew the port counterclockwise.

Step 2

Remove the magnetic ring together with connector port.
Check the condition of the magnet.

A set of spare parts

- Magnetic ring
- Plastic ball into the purge valve

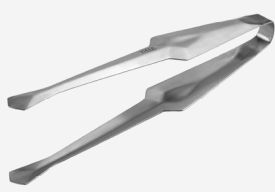

If you find it difficult to replace the magnets yourself or carry out hookah maintenance, there is an opportunity to use a paid service at the Hoob service center.

ACCESSORIES

The necessary equipment for using a hookah.

Bowl

Tongs

Heat management devices

WARNINGS

- Follow fire safety regulations.
- Do not touch the hookah parts exposed to heat with your hands until they cool down completely.
- Place the hookah on a flat surface for better stability.
- Wait until all sides of the coal are completely warmed up.

Hookahs with gold, bronze and black coating on the charcoal tray are vulnerable to fruit acids. Which are contained in pineapple, orange, apple and other fruits used in the form of a fruit bowl for hookah.

OPTIONAL ACCESSORIES

Increase the comfort of using and transporting the hookah.

Coal burner

Fork

Windcover

Molasses catcher

Carrying bags
